Summary of Discussion

Unit Managers Meeting
105-DR Large Sodium Fire Facility Closure Plan
313 Building Conference Room
Richland, Washington
December 19, 1991

In preliminary review of the work plan, Ecology (McKinney) noted that about half of the issues will be related to closure standards, which has an impact on sampling plans and the method of closure. Due to the demands of issuing the Hanford Site-Wide Part B, Ecology will be requesting an extension on issuance of the Notice of Deficiencies (NOD), and the NOD table is expected to be ready at the end of February 1992.

Due to errors in meetings minutes prepared for the November 11, 1991 105-DR UMM, signing of meeting minutes was deferred to the January 1992 UMM.

The status of Action Item 11-21-91:1, which is to arrange a site visit, is closed. The site visit was held on December 19, 1991.

The next 105-DR UMM is expected to take place in January 1992, and the exact time and place will be announced.
